MIRAD LAS MADRES!

mirad la lengua de sus niños

No hay nada como el Jarabe de Higos "California" si los niños están intranquitos, febriles, enfermizos, biliosos o estreñidos.

Atienda a sus niños ahora! Resguardélos de los resfriados, la gripe, mal de garganta y otras enfermedades, dándoles a tomar el Jarabe de Higos "California", que les quita toda la substancia venenosa del hígado y los intestinos.

Un laxante ahora, salva a un niño enfermo mañana. Los niños no dejan su tiempo de jugar por evacuar, lo que hace que obtengan los intestinos...

## SEÑORES COMERCIANTES

### A LA INFORMACION

#### PRO-COSTARRIENSES

Nuestro estimado colega "La Estrella de Panamá" ha tenido la amabilidad de ofrecer muy gustosamente sus columnas al señor V. Salazar para que le brinde una inserción a favor de los distanciantes en la última de las grandes ocurridas en San José.

#### LA "MISA DE CINCO"

Cinco centavos oro se está pagando por cada naranda poco más o menos según el número de comensales. En California o que puedan rivalizar con ellas, son las que alcanzan este precio; las que con cierta significación tienen "topical" en valor místico en las comidas de buena calidad, de esta diferencia, la noticia siempre viene siendo estimuladora para cultivar mejor de nuestros narandas.

#### PROBABLEMENTE BAJARA EL PUEBLO DE MERCADERIAS EN PANAMA

El señor Biehrich, diputado al Congreso panameño hizo moción para que los puestos de los comerciantes del Canal sean abiertas al público.

Caso que abolieron o suspendieron la ley que prohibe vender a los que no son empleados del Canal, el público vendría a ser altamente beneficiado, pues la diferencia que existe entre los precios de las mercaderías de los comerciantes y los de los demás almacenes es bastante sensible.

Los perjudicados serán algunos comerciantes, pero que hemos de hacer, un beneficiado, un perjudicado...

## QUE TIENE EL BEBE, QUE TANTO LLORA Y MAL DUERME?

### PREGUNTA PROPIA DE MADRES IGNORANTES O NEGLIGENTES

Esta pregunta, por más que aun se ve, cada vez se oye menos y pronto calará por no volverse a oír. Y que allí donde las madres son negligentes o imprevididas, que toman el lacto y la desazón de la criatura como una natural y corriente, propia de la serena infancia. Pero no se oye más el llanto de las madres preocupadas y solitarias sobre lo que cumple hacer en casos tales.

La condición natural de la criatura ana es jugar, no rabiar ni hacer raras a los demás. La criatura sabe descansar e impacientarse o llorar cuando tarde en darle de comer o el sueño la pide, lo cual no es, por cierto, señal que está mala. Así es como únicamente se oye o impacientan los niños tratados con el Jarabe Calmante y la acción Winslow cuando se indigestan o dan muestras de que algo les mole o los molesta. Así, pues, cuando están buenos, lloran por comer y por dormir para crear y desarrollarse, lo cual a ninguna madre apesadumbrada. Y siendo cada vez menor el número de madres ignorantes de lo que vale el Jarabe Calmante de la señora Winslow para ayudarlas a criar niños saludables y robustos, más raro se va haciendo de aquellas quejumbas antojadas, fajan, pues, a la botica, traigan un rascó y déjenle de preguntas balbías.

## Un baño interno le hará parecer y sentirse bien

Se dice que un vaso de agua caliente con una cucharada de fosfato antes del desayuno, aparta las enfermedades.

Esta excelente medida higiénica de buen sentido, la adoptan millones de personas.

Los médicos de todo el mundo recomiendan el baño interno sosteniendo que es de importancia mayor que el aseo exterior, porque los poros de la piel no abren sino por la acción de la savana, lo cual altera la salud, mientras que los poros de las diez yerdas de intestinos sí.

A los hombres y a las mujeres se les recomienda macerando el mar todas las mañanas antes del desayuno un vaso de agua caliente con una cucharadita de fosfato limonoso, como una medida para ayudar a limpiar el estómago, el hígado, los riñones y los intestinos el material indigesto del día anterior, los venenos, la bilis ácida y las toxinas, y así limpiar, suavizar y purificar todo el canal digestivo antes de introducir más alimento en el estómago.

Así como el jabón y el agua caliente limpian y refrescan la piel, de la misma manera el agua caliente y el fosfato limonoso obran sobre los órganos de eliminación.

Los que se despiertan con mal aliento, lengua saburrosa, mal sabor, o que tienen pesadez y dolor de estómago, o que se sienten, así como otras personas sueltas a ellas, que biliosas o a estreñimiento, deberían procurarse en la botica un suco de lima y fosfato limonoso. Costará poco, pero es suficiente para demostrar la importancia del baño interno. A los que continúan usándolo todas las mañanas, se los aseguran notables resultados, tanto respecto a salud como a apariencia.

Este año, debido a un nuevo perfeccionamiento en la industria automovilista, esta compañía ha aplicado las economías de una vasta producción a la variedad más completa de coches útiles que jamás ha sido ofrecida por cualquier fabricante de automóviles.

Todos los gastos generales que hasta hoy se habían cargado a una sola clase de coches, se han distribuido entre varios grupos, incluyendo no solamente coches de precio bajo, sino coches lujosos que se venden a precios moderados.

Ofrecemos a Ud. un verdadero valor en coches de cualquiera clase — todos coches de mérito — y alguno de los cuales, sin duda, se adapta especialmente a las necesidades y gustos de Ud.

Cualquiera de estos modelos representa tal mérito, que todo deseo que se tenga de satisfacer el orgullo, economía, seguridad y placer debe aconsejar la preferencia de un modelo Willys-Overland.

Sírvase Ud. indicarnos qué clase de coche desea. Podemos ayudarle en la elección. La solución será permanente, tal como han podido hacerlo millares de otras personas.

BELGIANS, AFTER STUBBORN FIGHTING DEFEATED BAVARIANS

REUTER SERVICE SPECIAL AND EXCLUSIVE LONDON, 28.— There has been a truce in infantry's fighting at our new front near Cambrai since Sunday noon, when the fighting ceased in their effort to regain the important position of Bourlon woods. The enemy continues heavily shelling some of our positions near Frontenoy, but the different reports, there were engagements between patrols, in which we made prisoners. The King has sent his congratulations to General Haig and British troops in the Cambrai. Germans have abstained in their attempts to reconquer the ground lost. The north of Verdun a violent artillery duel continued on Sunday. Violent attacks on the German positions in the mountains between the Brenta and the Plave, defending the prairies of the Ypres, ceased on Sunday. They were repelled by the North and in the middle of the line where Italian defences extend to the northwest by the Grappa mountains. The front of the prisoners. General Allenby's cavalry has captured positions three and a half miles to the West of Jerusalem, the strong Turkish fortifications in the heights at that side of the town and the hills defending the Judea river, four miles to the north. British patrols crossed the enemy's front during the night to reconquer the spur in the bank which defends north the passes. It has been announced in Paris that in the next few days the British and French Govt will move to issue a joint manifestation showing Russia's danger as a consequence of the usurpation of the Govt. Petrograd. It will condemn also the violation of 'promises which binds Russia, prohibiting to enter into separate peace negotiations. Lord Robert Cecil in a speech in the House of Commons, during the last two years all battles fought between British and Germans, the latter had been compelled to retreat. Our Commanders in the field have kept the enemy whenever they accept the challenge; we are rationally controlling the German colonies, and our victories in Palestine and Mesopotamia will be cause for Germany's deep sorrow.

LONDON, 29.— Monday night another counterattack on our front was repelled. Tuesday dawn we advanced near the village and towards La Fontaine. Germans heavily reinforced offered resistance. The battle changed its phases during the day but finally we advanced our line making 500 prisoners. Our new positions on Lindenbury's line in the hill to the west of Mouvres were attacked Tuesday evening but Germans were repelled. Auss-Germans continue in their gigantic efforts to open through the plainfields of the Veset. They are using constantly their best and newly arrived forces, heavy artillery and asphixiant and lachrymogenic gases. In their ever increasing attacks, Italians are gaining glory. The heretical resistance, their methods and stubbornly defend are equal to the best of the world. Two miles to the east of San Martin de Brenta valley, an Austrian division was launched against

as in normal times and nobody could imagine that another revolution is in progress. Krylenko, Chief Commander of the Maximists, has addressed a proclamation to the Army and Navy announcing that envoys appointed by him have returned from Germany with the official answer of the German Chief Commander agreeing to enter into negotiations for an armistice in all fronts. He ordered the immediate stopping of fighting in all Russian fronts. In the Turkish-Persian border, 4700 Turks surrendered to the Russians and in the Russian centre, near Baranovitch, the enemy attacked the Russian line, inflicting them 8000 casualties.

LONDON, 30.— Nothing important has occurred in Cambrai front. Gen. Haig reports that Germans made unsuccessful attempts in the vicinity of Lens. Artillery activity in Ypres front continues. The correspondent of the Reuters in the General Headquarters describes the heroic participation that grenadiers and Scotch and Irish guards took in the battle yesterday near Fontaine. Nearby was the third division of German guards of which we took prisoners in great number. British guards also fought bravely against a Prussian division. When our men advanced, Germans opened behind them a violent firing barrier which caused not many casualties. In the first 300 yards little resistance was opposed, but a heavy machine gun opened a red storming machine gun firing from the village and La Folle woods. Guards followed incessantly entering the streets where shells rained, captured house after house and in the evening, they controlled the village. Two German divisions arrived launching a counterattack against our troops which was repelled by the long and terrible fighting which had no time to consolidate their gains, not exposing them to a real storm of rifle and machine gun fire. Our troops retreated slowly. Under the pressure of this superior number of forces the rearward fighting was superb. Further to the west, our men overtook Germans in the vicinity of Bourlon village. At La Fontaine as well as in Bourlon, our artillery being very superior, swept Germans attempting to attack. We made during the day, larger gains, and captured 600 prisoners. Undoubtedly the enemy was severely punished. Fighting continues in the Italian front. The British plan to sweep Italians from the northern front at Asiago towards the Plave has failed. Last news from Petrograd inform that all the Ministers of the Provisional Government, except Kerensky, have been arrested. The whole garrison of Petrograd joined the Maximist. Stores are closed but the streets are crowded

LONDON, 31.— At Cambrai front we have advanced perceptibly. To the west of Bourlon woods the activity of German artillery has newly increased. In the Ypres, near Aschom, to the west of Southern front, the Bavarians attacked Belgians who repelled them after stubborn fighting. During last few days infantry attacks have stopped. In the Italian front, the Maximist Govt. a battery maintained a tremendous shelling on enemy's barges in the Piave. Officially has been informed that no change has been effected in the situation in Palestine. Last report of General Allenby said that British were four miles from Jerusalem. Interallied conferences were opened yesterday in Paris. Mentioned in a short speech welcomed the delegates. Pichon made a general declaration regarding to the matters submitted to the Conference. Though the Maximist Govt. announced that an armistice had been agreed upon it seems there are very probabilities of its carrying out. Workings conference gave Lenin a hostile reception, rebuffing the vote of congratulation for the armistice. It was announced afterwards that a coalition cabinet had been formed being headed by advanced socialist including representatives of the antiunist groups, headed by Bolsheviki. In the election to the National Constituent Assembly Bolsheviki was defeated even at the capital where at only three Army corps support the pacifist police of Bolsheviki. It is assumed that they will discuss the instruction to stop fighting.

LONDON, 1.— At Cambrai front we have advanced perceptibly. To the west of Bourlon woods the activity of German artillery has newly increased. In the Ypres, near Aschom, to the west of Southern front, the Bavarians attacked Belgians who repelled them after stubborn fighting. During last few days infantry attacks have stopped. In the Italian front, the Maximist Govt. a battery maintained a tremendous shelling on enemy's barges in the Piave. Officially has been informed that no change has been effected in the situation in Palestine. Last report of General Allenby said that British were four miles from Jerusalem. Interallied conferences were opened yesterday in Paris. Mentioned in a short speech welcomed the delegates. Pichon made a general declaration regarding to the matters submitted to the Conference. Though the Maximist Govt. announced that an armistice had been agreed upon it seems there are very probabilities of its carrying out. Workings conference gave Lenin a hostile reception, rebuffing the vote of congratulation for the armistice. It was announced afterwards that a coalition cabinet had been formed being headed by advanced socialist including representatives of the antiunist groups, headed by Bolsheviki. In the election to the National Constituent Assembly Bolsheviki was defeated even at the capital where at only three Army corps support the pacifist police of Bolsheviki. It is assumed that they will discuss the instruction to stop fighting.

LONDON, 2.— Nothing important has occurred in Cambrai front. Gen. Haig reports that Germans made unsuccessful attempts in the vicinity of Lens. Artillery activity in Ypres front continues. The correspondent of the Reuters in the General Headquarters describes the heroic participation that grenadiers and Scotch and Irish guards took in the battle yesterday near Fontaine. Nearby was the third division of German guards of which we took prisoners in great number. British guards also fought bravely against a Prussian division. When our men advanced, Germans opened behind them a violent firing barrier which caused not many casualties. In the first 300 yards little resistance was opposed, but a heavy machine gun opened a red storming machine gun firing from the village and La Folle woods. Guards followed incessantly entering the streets where shells rained, captured house after house and in the evening, they controlled the village. Two German divisions arrived launching a counterattack against our troops which was repelled by the long and terrible fighting which had no time to consolidate their gains, not exposing them to a real storm of rifle and machine gun fire. Our troops retreated slowly. Under the pressure of this superior number of forces the rearward fighting was superb. Further to the west, our men overtook Germans in the vicinity of Bourlon village. At La Fontaine as well as in Bourlon, our artillery being very superior, swept Germans attempting to attack. We made during the day, larger gains, and captured 600 prisoners. Undoubtedly the enemy was severely punished. Fighting continues in the Italian front. The British plan to sweep Italians from the northern front at Asiago towards the Plave has failed. Last news from Petrograd inform that all the Ministers of the Provisional Government, except Kerensky, have been arrested. The whole garrison of Petrograd joined the Maximist. Stores are closed but the streets are crowded

Hermosa Casa de Habitación

Se vende o se cambia por una finca rústica una hermosa casa de habitación, higiénica y confortable, de construcción contra temblores (haquear metálico), situada en uno de los lados más sanos de la ciudad, en el Alto de la Cuesta de Moras. La casa tiene amplios cuartos de cinco varas de alto con muy buena instalación de inodoros, cocina eléctrica, teléfono y toda clase de comodidades. Mide el terreno en que está ubicada 14163 varas cuadradas, dentro del cual hay un bonito parque sembrado de unos 35 árboles frutales importados. Tiene este solar salida a dos calles con la ventaja de poder tener un garaje para automóvil. Dirigirse al Apartado de Correos No. 617. 2804
