## DEPARTAMENTO NACIONAL DE ESTADISTICA

Damos hoy á la luz el tomo segundo de las Monografías Estadísticas de Costa Rica, correspondientes á la Sección Comercial; y aunque ellas no comprenden un lujoso exceso de datos, hemos preferido darlas al público á fin de no demurar por más tiempo esos informes que son, indudablemente, tanto más importantes, cuanto mayor sea la prontitud con que se pongan al alcance de la generalidad.

## Movimiento marítimo

El movimiento de entradas, habido en el Puerto de Puntarenas, comparado con el del año anterior, en lo relativo á vapores mercantes que son los que matifiestan el movimiento comercial, ha disminuido un 9,75 o¡o, mientras que por el Puerto de Limón esta disminución solo alcanza á un 2,79 о 0 .

En las páginas correspondientes se incluyen los cuadros respectivos, con todos los pormenores necesarios.

## Importación General

Presentamos al público los detalles relativos á la Importación habida durante el año de 1895 , según las escasas luces que para el caso ofrecen las facturas consulares, fuente de donde se extrajeron esos datos durante el año á que nos referimos.

Estableciendo comparación entre las.Importaciones habidas en 1894 y las del año 1895, resulta un aumento, en favor del segundo, que asciende á un 18, 8 oןo, cifra muy considerable si ṣe toma en cuenta el gran movimiento de Importación habido durante el año que hemos tomado como punto de comparación.

## Exportación General

Estos datos manifiestan, también, un halagüeño aumento en relación con las exportaciones del año de 1894, lo cual contribuye muy eficazmente á sostener, siquiera en parte, el equilibrio indispensable entre la Importación y Exportación.

Como se ve en los cuadros que publicamos á continuación, los artículos que ocupan lugar preferente en nuestras exportaciones son el café, las bananas, el caucho, la concha, los cueros de res, las pieles, las maderas y las velas de composición;-los demás objetos que ordinariamente se remiten á puertos extranjeros, si bien hacen una suma de consideración tomados en conjunto, parcialmente considerados son de raquítica importancia.

Comparando la Exportación de los artículos citados, correspondiente á los años de 1894 y 1895 obtenemos el resultado siguiente:
